Differences, cont. As Labov says: 1.Women conform more closely than men to sociolinguistic norms that are overtly prescribed, but conform less than men when they are not. 2. Men are less conforming than women with stable linguistic variables, and more conforming when change is in progress within a linguistic system.

### An introduction to sociolinguistics - LinkedIn SlideShare

Sociolinguistics takes language samples from sets of random population subjects and looks at variables that include such things as pronunciation, word choice, and colloquialisms. The is data is then measured against socio-economic indices such as education, income/wealth, occupation, ethnic heritage, age, and family dynamics to better understand the relationship between language and society.
