" Lexical Functional Grammar recognizes two different kinds of syntactic structures: the outer, visible hierarchical organization of words into phrases, and the inner, more abstract hierarchical organization of grammatical functions into complex functional structures.

Definition and Discussion of Lexical-Function Grammar

Parsing, syntax analysis, or syntactic analysis is the process of analyzing a string of symbols, either in natural language, computer languages or data structures, conforming to the rules of a formal grammar. The term parsing comes from Latin pars (orationis), meaning part (of speech).. The term has slightly different meanings in different branches of linguistics and computer science.
