The fuel vent line on most Cessna single engine aircraft attaches to a check valve inside the tank to prevent fuel from flowing out of the vent line, but this valve has a weep hole that allows some fuel to pass to prevent pressurization of the fuel tanks. Unfortunately, this weep hole is much lower than the fuel level of a full tank.

The Cessna Skyhawk is the ultimate training aircraft and the most popular single-engine aircraft ever built. With forgiving flight characteristics, great visibility, a sophisticated glass cockpit outfitted with G1000 avionics, slow landing speed and a forgiving stall - the Cessna Skyhawk is a flight training favorite ideally suited for student pilots.

Cessna Skyhawk

There is a very good chance that the pilot on your last airline flight once trained on a tiny Cessna 172 Skyhawk. It is a slow, stable, possibly even boring bug smasher. Its look could be considered dated: the Skyhawk is not nearly as eye-catching as its sleek, speedy friends, such as the all-composite Cessna TTX, or the Cirrus SR-20.
