office in the neighborhood. Data is transmitted down the signal fiber cable using wavelength division multiplexing (WDM), providing hundreds or thousands of separate channels. At each subscriber location, a Optical Network Unit (ONU) (also called an Optical Network Terminal (ONT)) acts like a DSL modem or cable modem and converts the signals in the

CHAPTER 10 THE INTERNET - Jake Messinger

Network design tools can perform a number of functions to help in the technology design process. Other network design tools can discover the existing network; that is, once installed on the network, they will explore the network to draw a network diagram. For example, simulation is used to model the behavior of the communication network.
