The Estimate. Electrical estimating is more art than science. Electrical contractors know that most of the profit or loss in a job comes from an estimator's desk, not the construction site. By that, they mean that estimates for most work are going to vary more than the actual cost of doing the work.

The labor cost per man-hour is significantly different in different areas of the country. For example, in the Southeast, a qualified licensed electrician might have a base pay rate of less than \$15 per hour. In the North or Midwest, the base pay rate might be over \$50 per hour. Therefore I have elected to use \$21 per man-hour for this discussion.
