Mechanical engineering elements. ZOLLERN mechanical engineering components consist of: precision steel shafts for linear technology, steering columns, rods, piston rods for hydraulic and pneumatic systems as well as flat guide rails. Depending on their type of utilisation, the products are inductive-hardened, ground, machined or hard-chrome coated to take the heaviest strains.

Elements of Mechanical Engineering by P.N. Gupta

While generally not considered to be a machine element, the shape, texture and color of covers are an important part of a machine that provide a styling and operational interface between the mechanical components of a machine and its users. Machine elements are basic mechanical parts and features used as the building blocks of most machines.
