The best interview preparation is a combination of hands-on practice over a representative set of problems with quality explanations. The best way to get this hands-on practice is by developing, running, and debugging programs in the environment you're most comfortable with, i.e., your own computer and IDE/editor:

EPI Judge Beta | Elements of Programming Interviews

I have worked at Microsoft, Google and Facebook as a software engineer, going through the full interview process every time. The thing to realize is that being good at technical interviews (as done by the above companies) is a skill unto itself but it is a skill an intelligent person with a comp sci background has the ability to get significantly good at after a 1 to 2 months of disciplined ...
