The Hurricane heater now has an additional secondary safety shut off feature. A high temperature, overheat aquastat as shown in the pictures below. This aquastat is a manual reset only type, and if tripped, should not be reset until an authorized ITR dealer or service representative has examined the heater.

CHAPTER 1

## **HURRICANE HEATING SYSTEM**

The HURRICANE®IIheater is a hydronic heating system that has many advantages compared to the older technology of forced-air systems. The hydronic system uses a solution of water and antifreeze to provide heating to fans in the interior space areas, as well as a continuous supply of domestic hot water for the sinks, shower, etc.

Hurricane II Combi heater. If you spend time on your boat during the cold season or live aboard you need a heater. A heat pump won't do in winter except to take some chill out of the air. Some real heat options include diesel fired heaters, propane heaters or a diesel fueled Hydronic system. A Hydronic system utilizes water heated by a furnace and then circulated through the cabin.

I have a Hurricane Heater in my 2003 Country Coach Intrigue. This past weekend I experienced some rather strange problems with the heater. We had limited power available (20 Amp) so I had to do some energy management. Whenever I used the Microwave or any other power hungry appliance I would always put the refrigerator on Propane, than shift back to electric when I was through. I noticed that ...
