The State Board of Education adopted the Science Framework on November 3, 2016. Curriculum frameworks provide guidance to educators, parents, and publishers, to support implementing California content standards.

Science Framework - Science (CA Dept of Education)

The Science Framework for California Public Schools aligns with the standards. The framework suggests ways in which to use the standards and make connections within and across grades; it also provides guidance for instructional planning. However, the standards do not prescribe the methods of instruction.

Science - Glencoe

The Next Generation Science Standards (NGSS) are K-12 science content standards. Standards set the expectations for what students should know and be able to do. The NGSS were developed by states to improve science education for all students. A goal for developing the NGSS was to create a set of research-based, up-to-date K-12 science standards.

Next Generation Science Standards

The purpose of this document is to provide California educators who use Project Learning Tree materials with an easy reference guide as to how PLT's activities align to the California Science Content Standards for grades K through 8. As part of the national movement to reform

California Science Content Standards

California's Science Standards for 5th Grade. Since 2013, California has been used the Next Generation Science Standards (NGSS) for all grade

levels. These standards are made up of three main areas: disciplinary core ideas; science and engineering practices; and cross-cutting practices.
