Installation CG-SVX02B-EN Operation Maintenance

I am looking at a Trane CGAC chiller that uses a W7900 controller. The chiller is set up to use only one of the two circuits (100 of the 200 nominal tons), which is sufficient for the application. So it has traditionally run only Compressor 1. Compressor 1 recently failed, which shouldn't be a problem - we just switched compressor #1 "off" and compressor #2 "on".
