Solutions to Problem Set #8: Introduction to Game Theory 1) Consider the following version of the prisoners dilemma game (Player one's payoffs are in bold):

	Player Two Cooperate	Player Two Cheat
Player One Cooperate	\$10 \$10	\$0 \$12
Player One Cheat	\$12 \$0	\$5 \$5

a) What is each player's dominant strategy? Explain the Nash equilibrium of the game.

Problem Set #8 Solutions: Introduction to Game Theory

Lecture 1 - Introduction: Five First Lessons Overview. We introduce Game Theory by playing a game. We organize the game into players, their strategies, and their goals or payoffs; and we learn that we should decide what our goals are before we make choices. With some plausible payoffs, our game is a prisoners' dilemma.

6 Best Game Theory Course & Certification [2020]

I think one area people struggle with is not really the mechanics of poker, but rather how to think about the game, or games in general. This seems to be a big help in that area, and it's free! :) If anyone has been through them, I'd love to hear what you thought of them and if you think it's worth going through the whole series.
